

# BULLETIN

Friday 4 March 2022

No. 6

## Have you seen the latest FCDO Document Handling Policy?

The new policy is now live and should be followed for all FCDO projects. This includes floor plans. The [Classification of FCDO Estate Construction Documents Policy](#) is found under the [Documentation Process](#) in the Security Swim Lane of the PPM.

## NEC Contracts

The NEC contracts have been updated and are available on the [NEC4 Contract Documents](#) page – A reminder that this should always be your default location to download the latest NEC templates. Also added is a new sub-button for [NEC Group Membership](#). Here you will find instructions about how to set up a personal account with NEC. This will give you access to our group benefits and discounts, as well as other useful information.

## The Construction Information Service

The PSC subscribes to [CIS](#) via the IHS platform. It is an online tool that gives access to current regulations, construction standards and other useful technical advice and news. If you would like to trial the site, use the link on the page to access the online tool.

**Feedback:** All [feedback](#) thus far has been gratefully received. Please continue with your comments and suggestions on Version 2.0 of the PPM.
